

Congregate Facility Responses & Community Outbreaks

Data through week of 02/7/2021 (Week 5)

All data are preliminary and subject to change as cases are investigated

The Number of Reported COVID-19 Outbreaks Continue to Remain Low (N=541)

Data are reported by MMWR week, which is the week of the year assigned by the National Notifiable Diseases Surveillance System for the purposes of disease reporting. Week 10 began on March 1.

§If symptom onset dates are unknown, the first test date is used. Three outbreaks are excluded from this graph due to missing onset dates.

*Illinois Department of Public Health criteria for defining an outbreak in non-healthcare community and school settings was updated from 2 or more cases to 5 or more on October 27. Outbreaks in congregate care living facilities including long-term care, acute care and critical access hospitals, and child care settings remain at 2 or more cases. Cases must have symptom onsets within 14 days of each other and be epidemiologically linked to the outbreak setting.

Long-term care includes, skilled nursing and assisted living facilities. Congregate living includes, correctional facilities, homeless shelters, group homes, and other residential care facilities. School/IHE includes, K-12 schools and institutes of higher education

Confirmed COVID-19 Deaths are Rarely Associated with a Known Outbreak (red/pink) in the Second Wave

■ LTC SNF or AL (n = 1192) ■ Other Outbreak (n = 75) ■ Not Associated with an Outbreak (n = 3435)

LTC = Long-term care facility; SNF = Skilled nursing facility, AL = Assisted living facility

★ Daycares and Schools Continue to Report Individual Cases and Clusters Most Frequently

Data are reported by MMWR week, which is the week of the year assigned by the National Notifiable Diseases Surveillance System for the purposes of disease reporting. Week 13 began on March 22. Reporting mechanisms for different facility types have changed over time.

Child Care & Schools

School Cases are Rising, but Remain Below Peak of Second Wave

Schools

- 92 cases in 46 facilities
- 2 new outbreaks**

Daycares

- 23 cases in 32 facilities
- 4 new outbreaks**
- All outbreaks are 4 or fewer cases

*By report date (week 5)

**IDPH criteria for defining an outbreak in school settings was updated from 2 or more cases to 5 or more on October 27. Outbreaks in child care settings/daycares remain at 2 or more cases. Cases must have symptom onsets within 14 days of each other and be epidemiologically linked to the outbreak setting.

★ Large Increase in Cases Among School Children, but Daycare Cases Remain Steady

Pediatric cases (0-17 years old) continue to be a small proportion of citywide cases (Week 5)

Workplaces & Community Settings

Workplace-Associated Clusters Have Increased in the Second Wave, but Reported Outbreaks* Remain Lower

Increases: Retail, Hotel, Construction, Warehouse/Distribution Centers, Office Settings, Grocery Stores, Factory/Manufacturing
 Decreases: Janitorial

*Public Health Guidance Changes:

1) Effective 10/01/20: Public Health Order 2020-2 mandates reporting of: any businesses who suspend operations due to COVID-19 cases among employees or patrons, and any with knowledge of 5+ cases among employees or patrons within a 14-day period. 2) Effective 10/27/20: Outside of congregate care, daycare and acute/critical access hospital settings, IDPH has raised the threshold for outbreak definition to five or more laboratory-confirmed cases. "First Wave" outbreaks shown with < 5 confirmed cases include 2 in food production, 1 restaurant and 1 in manufacturing.
